- ✓ Hybrid Apps development with PhoneGap
- ✓ Native Apps development : Android (Java) and iOS (Swift 3)
- ✓ IDEs: Eclipse, Netbeans, Android Studio, Xcode
- ✓ Backend : AWS, XML/JSON, REST/SOAP

☒ **WordPress Themes Development Process**

I translate delivered designs (PSD, AI, Xd, Sketch) into responsive WordPress theme. At first I slice design into HTML/CSS. I use one of the most popular CSS libraries - Bootstrap - so my themes displays properly on all browsers. After that I integrate the HTML with WordPress by creating custom theme. I make the content editable thanks to ACF plugin, which creates custom fields. With them you just input the data and that's all! Everything works as expected and there is no way to break the layout. To handle contact forms I use plugins like Contact Form 7, Formidable or Gravity Forms. In the end we have fully functional WordPress website.

☒ **Reasons to hire me**

- ✓ I have over 10 years of commercial experience. I accomplished over 900 jobs which is one of the highest number reached by a single person!
- ✓ I'm always learning and following latest development standards. I provide high quality and well tested products.
- ✓ I provide realistic deadlines that I always met.
- ✓ I work on both Mac and Windows. I also test my work on iPhone and Android phones. This way you can be sure that your website shall display properly on any device.
- ✓ I'm flexible with my working hours, because I'm a fulltime freelancer.
- ✓ I'm available on daily basis. You will know the current status of the job because I contact you with the updates frequently.
- ✓ I believe good communication is the key to successful project. That's why I always respond promptly.
